Fund Overview

A highly concentrated, unconstrained global equity strategy. Our approach is bottom-up seeking to invest in quality companies trading at a discount to intrinsic value.

Fund Highlights

- True active global equity investing – 90%+ active share.
- Highly concentrated – 17-25 high conviction stocks.
- Rigorous 'bottom-up' analysis – team approach to best stock holdings.
- Long-standing team – spanning sector and geographic specialities.
- Unconstrained – no limits on country or sector exposures.
- Quality & value bias – integral to risk management.

Potential significant risks

Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries.

Investment Philosophy

Quality: Strong competitive advantages, consistent cash returns to shareholders, skilled management, a history of attractive returns on capital and the opportunity to make attractive reinvestments are characteristics of “quality” companies. These companies can often sustain their returns for longer than the market recognises or are less likely to experience irreversible declines in profitability.

Discount Valuation: means buying below intrinsic value and we think the behavioural biases of other investors give us opportunities to do this.

We use detailed analysis of cash flow and other fundamentals, our experience and deep discussion between sector analysts and portfolio managers to identify “quality” companies at a significant discount to our estimate of intrinsic value.
